

PCMH High Priority Beneficiary (HPB) selection

HPB selection is a three-month activity - *Identify top 10% of high-priority patients*

The [AHIN portal](#) has been updated with your provider's caseload listing. Practices enrolled in the PCMH program can now make their selection of HPBs for the 2020 PCMH Performance Period.

As a reminder - PASSE members are **not** included in this list. Please use your February PHM report for your most up to date attribution listing.

The deadline for this activity is March 31, 2020. If you choose, you can select five additional HPBs after the deadline. Additional selection is NOT mandatory. Your March PHM report will provide you with the most up-to-date beneficiary attribution to assist with your additional selection.

The AHIN portal will close after the deadline; therefore, you will need to reach out to your [AFMC Provider Relation's Outreach Specialist](#) and provide them with the information of your added HPBs. Please note your PHM report will show the additional HPBs, but the AHIN portal will not populate until quarter 2. Providers will have until Wednesday, April 8, 2020, to inform their AFMC Outreach Specialist of their selection.

Please see the [Arkansas Payment Initiative website](#) to review the Arkansas Medicaid PCMH manual and addendum or contact PCMH@afmc.org for additional questions.
