

PCMH High-priority Beneficiary (HPB) Selection – Deadline March 31

The Quality Care Insight (QCI) portal has been updated with your provider's caseload listing. Practices enrolled in the PCMH program can now make their selection of HPBs for the 2022 PCMH Performance Period.

The deadline for this activity is March 31. If you choose, you can select five additional HPBs per PCMH practice after the deadline. An additional selection is NOT mandatory. Your March PHM report will provide you with the most up-to-date beneficiary attribution to assist with your additional selection. The deadline for the additional selection is April 8.

The QCI portal will close after the deadline of March 31; therefore, you will need to reach out to your AFMC Provider Relation's Outreach specialist and provide them with the information of your added HPBs. Please note your PHM report will show the additional HPBs, but the QCI portal will not populate until quarter 2. Again, providers will have until Friday, April 8, to inform their AFMC Outreach specialist of their selection.

Please see the [Division of Medical Services website](#) to review the Arkansas Medicaid PCMH manual and addendum. You may also email PCMH@afmc.org for additional assistance.
