

## UPDATE: Personal Protective Equipment (PPE)/Cleaning Program

A fillable word document can be accessed by [clicking this link](#).

The Personal Protective Equipment (PPE)/Cleaning program is a limited program funded by the CARES Act, intended to help providers with extraordinary PPE and cleaning costs due to the public health emergency. DHS has a total of \$1.2 million for this program and will make payments only while funds are available. Examples of acceptable expenses include costs for professional cleaning services due to COVID-19 exposures on the facility premises and costs for PPE and cleaning supplies over-and-above the costs for those items that the facility would have expended. Acceptable proof of expenses includes copies of receipts and invoices marked paid.

Sincerely,

**AFMC Provider Relations**
