ARKANSAS DEPARTMENT OF HUMAN SERVICES
The State of Arkansas’ Division of Medical Services (DMS) has contracted with Medicaid Managed Care Services (MMCS), a division of the Arkansas Foundation for Medical Care, to survey beneficiaries who have received transportation services under the Non-Emergency Transportation waiver. This beneficiary satisfaction survey asks questions about beneficiaries’ experiences scheduling a ride with their transportation broker, the quality of the rides, and how well the Non-Emergency Transportation system met any special needs they had. The information received will help DMS determine which services beneficiaries use and how beneficiaries evaluate the Non-Emergency Transportation program and its services. Data collection occurred from August 2014 to November 2014. This is the 11th year for the Non-Emergency Transportation Survey.
Who was surveyed

All Medicaid beneficiaries who utilized Non-Emergency Transportation program services between Jan. 1 and June 30, 2014, were eligible to participate. From this group, MMCS mailed surveys to 1,912 randomly selected Medicaid beneficiaries. After excluding beneficiaries with undeliverable addresses, 1,714 beneficiaries received a survey.

How many responded

MCS received surveys from 649 beneficiaries before the cutoff date. Of those, 647 were eligible for analysis, resulting in a final response rate of 39.4 percent.
Overall Quality and Satisfaction 2014

Survey participants were asked to rate their satisfaction with the following on a scale from 0 to 10, with 0 being “worst possible” and 10 being “best possible.” The scores below represent an average of all responses received.

- Scheduling a ride: 8.39
- Quality of ride: 8.34
- Non-Emergency Transportation program: 8.47

Of the beneficiaries who responded, the percentage of beneficiaries indicating a high degree of satisfaction (a score of 8 or higher):

- Scheduling a ride: 76.10%
- Quality of ride: 75.76%
- Non-Emergency Transportation program: 77.54%
Self-Reported Utilization Rates

Percentage of respondents who reported:

- **✔ Got a ride (in past 12 months)** 95.87%
- **✔ Got frequent rides (four or more rides in 12 months)** 75.84%
- **✔ Needed help from the driver getting in and out of the vehicle** 31.45%
- **✔ Have a hearing impairment** 8.88%
- **✔ Used a wheelchair or other equipment** 24.64%
- **✔ Rode weekly to appointments** 18.53%
Access and Availability of Services

95.3% of respondents reported little or no problem getting the driver to help them get in and out of the van or car.

100.0% of respondents reported little or no problem getting a ride because of hearing impairment.

96.9% of respondents reported little or no problem getting a van that could make room for their equipment or meet any other special needs.

88.0% of respondents reported little or no problem getting rides to and from their regularly scheduled appointments.
Ease of Getting a Ride

88.3% of respondents reported they usually or always were able to schedule a ride with one phone call.

86.7% of respondents reported they never or sometimes needed their doctor’s approval in order to schedule a ride.

99.3% of respondents reported that they never or sometimes had trouble scheduling a ride because they spoke a different language.
Timeliness and Reliability

87.6% of respondents reported their driver usually or always showed up at their home on time to take them to their scheduled appointment.

87.6% of respondents reported their driver never or sometimes dropped them off for their appointment too early (more than 30 minutes).

95.7% of respondents reported their driver never or sometimes dropped them off late for their appointment.

80.0% of respondents reported they never or sometimes waited more than 30 minutes to be picked up after their appointment was over.

84.1% of respondents reported that their driver usually or always picked them up after their appointment to take them home.
Courtesy of Staff

- **92.2% of respondents** agreed that the transportation staff always or usually treated them with courtesy and respect when they called to get a ride.

- **92.3% of respondents** agreed that the transportation staff always or usually treated them with courtesy and respect during the ride.

Safety

- **94.3% of beneficiaries** surveyed said that the driver usually or always drove safely.

- **90.2% of beneficiaries** surveyed said that the driver usually or always made sure riders wore seat belts.
Medicaid Managed Care Services (MMCS) provides utilization review and quality assurance services for ConnectCare and other waivered managed care programs. MMCS is a division of the Arkansas Foundation for Medical Care (AFMC).

Community-based and clinically oriented, AFMC works collaboratively with health care plans, providers, facilities and physicians to identify opportunities for improvement and encourage innovation in health care. AFMC strives to ensure health care quality in a meaningful and effective way by initiating quality improvement projects and disseminating information about best practices.
