ARKids 1st B

A PROGRAM OF THE ARKANSAS DEPARTMENT OF HUMAN SERVICES,
DIVISION OF MEDICAL SERVICES

2018 Beneficiary Satisfaction Survey Results
Arkansas Medicaid’s ARKids First program is one of the most successful children’s health care programs in the United States. ARKids First was seen as an innovative program when it was implemented, and later became a model for the Children’s Health Insurance Program (CHIP) federal mandate. ARKids First B provided for the health care needs of more than 30,000 Arkansas children in State Fiscal Year 2018.

About the Survey

ARKids First B continuously strives to improve its quality. To this end, AFMC, an independent organization, has surveyed the parents and caregivers of ARKids First B beneficiaries. The results will be used to examine beneficiary satisfaction with the ARKids First B health program.

AFMC used the Consumer Assessment of Healthcare Providers and Systems (CAHPS®)* program and followed its surveying protocol. CAHPS is scientifically designed to measure and report the experiences that form consumer health care satisfaction. This tool was jointly developed by the Harvard University Medical School, RAND and the Research Triangle Institute, and funded by the Agency for Healthcare Research and Quality (AHRQ).

AFMC conducted the latest survey by mail from January 2018 to April 2018. All individual responses and comments were kept confidential.

*CAHPS® is a registered trademark of the Agency for Healthcare Research and Quality (AHRQ).
Who Was Surveyed

All ARKids First B beneficiaries who had been enrolled for at least six months prior to the survey were eligible to participate. From this group, AFMC mailed surveys to the parents/caregivers of 2,304 randomly selected ARKids First B beneficiaries. After excluding beneficiaries with undeliverable addresses or who no longer met eligibility criteria, 1,954 beneficiaries received a survey.

How They Responded

AFMC received completed surveys from the parents or caregivers of 431 beneficiaries (18.7 percent) before the cutoff date. Of these, 412 were eligible for analysis, resulting in a final analyzable rate of 21.1 percent.

Access and Availability of Services

93% of respondents reported no problem seeing a doctor or nurse since enrolling in ARKids First B, compared with 84 percent who reported no problem before joining the program.

93% of respondents reported no problem getting prescription medicines since joining ARKids First B, compared with 88 percent who reported no problem before joining the program.

90% of respondents reported no problem getting urgent care from a doctor’s office or the emergency room since enrolling in ARKids First B, compared with 89 percent who reported no problem before joining the program.
Quality of Care

Getting the Care You Need:

86% of beneficiaries’ parents or caregivers who responded to the survey indicated that it was “always” or “usually” easy:
- Getting appointments with specialists
- Getting care, tests or treatment through ARKids First B

Getting Care without Long Waits:

90% of respondents said they “always” or “usually”:
- Received an appointment for regular or routine health care as soon as they wanted
- Received immediate care for an illness or injury as soon as they wanted
Customer Service

Courtesy, Respect and Helpfulness of the Customer Service Staff:

77% of beneficiaries’ parents or caregivers surveyed said that ARKids First B customer service staff “always” or “usually”:  
- Treated them with courtesy and respect  
- Were as helpful as they thought the staff should be
Doctors Who Communicate Well:

96% of respondents agreed that their doctor “always” or “usually”:
- Listened carefully to them
- Explained things in a way they could understand
- Showed respect for what they had to say
- Spent enough time with their child
- Explained things in a way their child could understand

Shared Decision Making:

78% said “yes,” their doctor or other health provider, when talking about starting or stopping a prescription medicine:
- Talked with them about the reasons they might want their child to take a medicine
- Talked with them about the reasons they might not want their child to take a medicine
- Asked them which choice they thought was best for their child
**Beneficiary Satisfaction**

**ARKids First B Program:**

The average ranking for ARKids First B based on a scale of 0 to 10.

**8.36**

...of the respondents gave ARKids First B a rating of 8 or above.

“Thank you for such a program as ARKids B. I never have to worry about my children and their medical needs.”

— Parent from Stone County
AFMC provides utilization review and quality assurance services for Arkansas Medicaid’s ARKids First and other waived managed care programs.

Community-based and clinically oriented, AFMC works collaboratively with health care plans, providers, facilities and physicians to identify opportunities for improvement and encourage innovation in health care. AFMC strives to ensure health care quality in a meaningful and effective way by initiating quality improvement projects and disseminating information about best practices.
