PCMH High Priority Beneficiary (HPB) selection

The [AHIN portal](#) has been updated with the current caseload listing. Practices enrolled in the PCMH program can now make their selection of HPBs for the 2019 PCMH Performance Period. PASSE members are NOT included in this updated list.

HPB selection is a three-month activity - *Identify top 10% of high-priority patients*

The deadline has been extended from March 31 to April 12. Please note due to the deadline extension, HPB selection and any metric affected will not be available on the monthly Population Health Management (PHM) report until May. If manual selection of HPBs are not completed by the April 12 deadline, the system will automatically select beneficiaries, based on risk score, at 12:01 a.m. April 13.

Please see the [Arkansas Payment Initiative website](#) to review the Arkansas Medicaid PCMH manual and addendum or contact PCMH@afmc.org for additional questions.
