Population Health Management Report (PHM) Arkansas Medicaid Patient Centered Medical Home (PCMH) Practices

The PHM report was created because DMS recognized the need for more current data to allow PCMH providers to close the gaps of services to Medicaid beneficiaries. The PHM monthly report can be accessed through the [AHIN portal](#) under PCMH reports.

The data is updated monthly from paid Medicaid claims. It is provided in an Excel spreadsheet and gives detailed information for each PCMH metric in separate tabs. Providers can easily identify the needs of their beneficiaries by identifying their HPB attribution and what services beneficiaries lack to meet their needs, as well as the requirements of Arkansas Medicaid PCMH.

Your AFMC Provider Relations Representative is happy to assist you navigate this report if assistance is needed.
