Performing a security risk analysis (SRA) is not only a HIPAA requirement, it’s good business.

Why should we conduct a security risk analysis?
The HIPAA Security Rule requires covered entities to conduct an annual risk assessment of their health care organization to ensure the privacy and security of their patients’ protected health information (PHI). Electronically protected health information is critical to your business and vital to the care of your patients. Conducting a SRA will help identify areas where PHI could be at risk.

Is all patient health information subject to the Security Rule?
All electronic health information (ePHI) that is created, received, maintained or transmitted by an organization is subject to the Security Rule. The rule also requires entities to evaluate risks and vulnerabilities in their environment and implement appropriate security measures to protect the integrity and security of ePHI.

When should a SRA be conducted?
Completing a SRA and correcting deficiencies is an annual HIPAA requirement for any covered entity or business associate that holds protected health information in electronic form. The SRA is a mandatory requirement for many incentive programs such as the Quality Payment Program and Meaningful Use (Promoting Interoperability). The SRA should be performed or reviewed annually to be HIPAA compliant and meet program reporting requirements.

How can AFMC help my practice conduct a SRA?
Our team of certified, experienced health IT professionals can help your practice with the following:

- Align policies and procedures with HIPAA standards
- Develop custom privacy and security policies and procedures
- Identify and document potential threats, vulnerabilities and possible impact to your operations
- Reduce your clinical staff burden
- Provide guidance on documenting corrective actions needed to mitigate identified risks
- Deliver report findings and supporting documentation
- Consult, educate and guide your staff on HIPAA best practices
- Proprietary tools and processes that address the key SRA components: Technical, administrative and physical safeguards
- Onsite assessments available (virtual or in-person)

Benefits of working with AFMC
- Nearly 10 years’ experience successfully completing more than 1,600 SRAs
- Expertise and in-depth knowledge of HIPAA compliance standards and SRA requirements

If you have questions or would like more information, please contact AFMC at 501-906-7511, SRA@afmc.org or visit afmc.org/SRA.
